Research Monograph:

Oscillation Theory for Functional Differential Equations, Pure and Applied Mathematics: A Series of Monograghs and Textbooks, Marcel Dekker, Inc., 1995. (with L. Erbe and B. G. Zhang)

Graduate Textbook:

A Short Course in Ordinary Differential Equations, Springer, Universitext, 2014.

Published Research Papers:

1. Fractional Lyapunov-type Inequalities with Mixed Boundary Conditions on univariate and multivariate domains, *J. Fract. Calc. Appl.*, **11** (2020), 148-159.

2. Lower bounds for the eigenvalues of first-order nonlinear Hamiltonian systems on time scales, *Applied Mathematics Letters*, **90** (2019), 154-161. (with A. Zafer)

3. Non-monotonic behavior of one-signed solutions of quasilinear differential equations, *Mediterr. J. Math.* **15** (2018), no. 4, Art. 184, 17 pp. (with Mervan Pasic)

4. Linear Sturm-Liouville problems with Riemann-Stieltjes integral boundary conditions, *Opuscula Math.*, vol. 38, no. 4 (2018), 557-571. (with Tom St. George)

5. Friedrichs Extensions for Singular Hamiltonian Operators with Intermediate Deficiency Indices, *J. Math. Anal. Appl.*, **461** (2018), 1672-1685. (with Z. Zheng)

6. Oscillation criteria for higher-order nonlinear dynamic equations with Laplacians and a deviating argument on time scales. *Math. Methods Appl. Sci.* **40** (2017), 4028-4039. (with T. S. Hassan)

7. Lyapunov-type inequalities for α-th order fractional differential equations with $2 < \alpha \leq 3$ and fractional boundary conditions, *Electron. J. Differential Equations*, 2017 (2017), No. 203, pp. 1-15. (with Sougata Dhar)

8. On a fractional boundary value problem with a perturbation term, *J. Appl. Anal. Comp.*, **7** (2017), 57-66. (with J. Graef, L. Kong, and M. Wang)

9. Positive solutions of a singular fractional boundary value problem, Enlightenment of Pure and Applied Mathematics 2 (2016), 143-152. (with Lingju Kong)

10. Lyapunov-type inequalities for odd order linear differential equations, *Electron. J. Differential Equations*, **2016** (2016), No. 243, pp. 1-10. (with S. Dhar)

11. Fractional boundary value problems and Lyapunov-type inequalities with fractional integral boundary conditions, *EJQTDE*, **43** (2016), 1-16. (with S. Dhar and M. McCabe)

12. Linear Sturm-Liouville Problems with general Homogeneous Linear Multi-point Boundary Conditions, *Math. Nachr.* (2016), 1-12. (with Tom St. George)

13. Lyapunov-type inequalities for third-order linear differential equations, *Math. Inequal. Appl.* **19** (2016), 297-312. (with S. Dhar)

14. Essential spectrum of singular discrete linear Hamiltonian systems, *Math. Nachr.* **289** (2016), 343-359. (with H. Sun and Y. Shi)

15. Asymptotics and oscillation of nth-order nonlinear dynamic equations on time scales, *Appl. Math. Comput.*, **275** (2016), 324-334. (with S-Y. Zhang and Q-R. Wang)

16. Lyapunov-type inequalities for higher order half-linear differential equations, *Appl. Math. Comput.*, **273** (2016), 114-124. (with S. Dhar)

17. Positive solutions of boundary value problems for higher-order nonlinear fractional differential equations, *Communications in Applied Analysis*, **19** (2015), 527-542. (with M. McCabe)

18. A fractional boundary value problem with Dirichlet boundary condition, *Communications in Applied Analysis*, **19** (2015), 497-504. (with J. Graef, L. Kong, M. Wang)

19. Multiple solutions of systems of fractional boundary value problems, *Applicable Analysis*, **94**(2015), 1288-1304. (with J. Graef and L. Kong)

20. Matching method for nodal solutions of boundary value problems with integral boundary conditions, *Communications in Applied Analysis*, **19** (2015), 129-148. (with T. St. George)

21. Asymptotic behavior of third order functional dynamic equations with γ-Laplacian and nonlinearities given by Riemann-Stieltjes integrals, *Electron. J. Qual. Theory Differ. Equ.* 2014, No. 40, 21 pp. (with T. S. Hassan)

22. Asymptotic and oscillatory behavior of nth-order half-linear dynamic equations, *Differ. Equ. Appl.*, **6** (2014), 527-549. (with T. S. Hassan)

23. Liapunov-type inequalities for third-order half-linear equations and applications to boundary value problems, *Nonlinear Analysis*, **110** (2014), 170-181. (with S. Dhar)

24. Existence and Uniqueness of solutions for a fractional boundary value problem with a separated boundary condition, *Dynamic Systems Appl.*, **23** (2014), 691-697 (with L. Kong and M. Wang)

25. Existence of nodal solutions of boundary value problems with multi-point boundary conditions, *Dynamic Systems Appl.*, **23** (2014), 245-264. (with T. St. George)

26. Second-order differential equations: some significant results due to James S.W. Wong, *Differential Equations & Applications*, **6** (2014), 99-163. (with M. Pasic)

27. Infinitely many solutions for a discrete fourth order boundary value problem, *Nonlinear Dynamics and Systems Theory*, **13** (2013), 400-411. (with J. Graef and L. Kong)

28. Existence and uniqueness of solutions for a fractional boundary value problem with Dirichlet boundary condition, *Electronic Journal of Qualitative Theory of Differential Equations*, **2013** (2013), 1-11. (with J. Graef, L. Kong and M. Wang)

29. Oscillation criteria for second order nonlinear dynamic equations with p-Laplacian and damping, *Acta Mathematica Scientia*, **33B**, 975-988 (2013). (with T. S. Hassan)

30. Positive solutions of nonlocal fractional boundary value problems, *Discrete and Continuous Dynamical Systems*, **Supplement** (2013), 283-290. (with J. Graef, L. Kong, M. Wang)

31. Fractional boundary value problems with integral boundary conditions, *Appl. Anal.*, **92** (2013), 2008–2020. (with J. R. Graef, L. Kong, and M. Wang)

32. Linear Sturm-Liouville Problems with Multi-point Boundary Conditions, *Math. Nachr.*, **286** (2013), 1167-1179. (with L. Kong, M. K. Kwong, and J. S. W. Wong)

33. Uniqueness and parameter dependence of positive solutions to higher order boundary value problems with fractional q-derivatives, *Journal of Applied Analysis and Computation*, **3** (2013), 21-35. (with J. R. Graef, L. Kong, and M. Wang)

34. Matching method for nodal solutions of multi-point boundary value problems, Differ. Equ. Appl., **5** (2013), 13-31. (with T. St. George)

35. Using time scales to study multi-interval Sturm-Liouville problems with interface conditions, *Results in Math.*, **63** (2013), 451-465. (with Qi-Ru Wang)

36. Eigenvalue approach to even order system periodic boundary value problems, *Canadian Mathematical Bulletin*, **56** (2013), 102-115. (with Min Wang)

37. Oscillation of forced impulsive differential equations with γ-Laplacian and nonlinearities given by Riemann-Stieltjes integrals, *Electronic Journal of Qualitative Theory of Differential Equations*, **98** (2012), 1-16. (with T. S. Hassan)

38. On a generalized discrete beam equation via variational methods, *Communications in Applied Analysis*, **16** (2012), 293-308. (with J. R. Graef, L. Kong)

39. Application of the mixed monotone operator method to fractional boundary value problems, *Fractional Differential Calculus*, **2** (2012), 87-98. (with J. R. Graef, L. Kong)

40. Oscillation criteria for forced second order differential equations with deviating arguments, *Communications in Applied Analysis* **16** (2012), 459-470. (with M. Wang)

41. Interval criteria for forced oscillation of differential equations with p-Laplacian and nonlinearities given by Riemann-Stieltjes integrals, *J. Korean Math. Soc.*, **49** (2012), 1017-1030. (with T. S. Hassan)

42. Uniqueness of positive solutions of fractional boundary value problems with non-homogeneous integral boundary conditions, *Fractional Calculus and Applied Analysis*, 15, No 3 (2012), 509-528. (with J. R. Graef, L. Kong, and M. Wang)

43. Even order system boundary value problems with periodic boundary conditions, *Dynamic Systems Appl.*, **6** (2012), 223-228. (with M. Wang)

44. Positive solutions of nonlinear fractional boundary value problems with Dirichlet boundary conditions, *Electronic Journal of Qualitative Theory of Differential Equations*, **17** (2012), 1-13. (with M. Wang)

45. Inverse Sturm-Liouville problems with finite spectrum, *J. Math. Anal. Appl.*, **386** (2012) 1-9. (with A. Zettl)

46. Second order boundary value problems with sign-changing nonlinearities and nonhomogeneous boundary conditions, *Mathematica Bohemica*, **136** (2011), 337-356. (with J. R. Graef, L. Kong, and B. Yang)

47. Positive solutions of even order periodic boundary value problems, *Rocky Mountain J. Math.*, **41** (2011), 1907-1931. (with M. Wang)

48. Interval criteria for forced oscillation of differential equations with p-Laplacian, damping, and mixed nonlinearities, *Dynamic Systems Appl.*, **20** (2011), 279-294. (with T. S. Hassan)

49. Higher order boundary value problems with two point separated nonhomogeneous boundary conditions, *Communications in Applied Analysis*, **15** (2011), 435-456. (with J. R. Graef, L. Kong, and B. Yang)

50. Interval criteria for forced oscillation with nonlinearities given by Riemann-Stieltjes integrals, *Computers and Mathematics with Applications.* **62** (2011), 243-252. (with Y. Sun)

51. Dependence of the unique solution of a periodic boundary value problem on the parameter, *Applied Mathematics and Computation*, **217** (2011), 7838-7844. (with H. Bellout and M. Wang)

52. Nonlinear boundary value problems with p-Laplacian, *Communications in Applied Analysis*, **15** (2011), 25-46. (with X. Wang)

53. The study of Jacobi and cyclic Jacobi matrix eigenvalue problems using Sturm-Liouville theory, *Linear Algebra and Appl.*, **434** (2011), 1648-1655. (with A. Zettl)

54. Positive solutions to a fourth order boundary value problem, *Results in Math.*, **59** (2011), 141-155. (with J. R. Graef, L. Kong, B. Yang)

55. Nodal solutions of boundary value problems with boundary conditions involving Riemann-Stieltjes integrals, *Nonlinear Analysis-TMA*, **74** (2011), 2380-2387. (with J. Chamberlain and L. Kong)

56. Higher order multi-point boundary value problems, *Math. Nach.*, **284** (2011), 39-52. (with J. R. Graef and L. Kong)

57. Oscillation of a Forced Second Order Differential Equation with a Deviating Argument, Functional Differential Equations, **17** (2010), 141-155. (with J. S. W. Wong)

58. Ambrosetti-Prodi-type results for a third order multi-point boundary value problem. Nonlinear Stud. **17** (2010), 121-130. (with J. Graef and L. Kong)

59. Positive solutions of boundary value problems with p-Laplacian, *Electron. J. Diff. Equ.*, **2010** (2010), No. 126, pp. 1-16. (with M. Wang)

60. Asymtotics of Eigencurves for Half-linear Sturm-Liouville Problems, *Proceedings of Neural, Parallel, and Scientific Computations*, **4** (2010), 215-220. (with L. Kong)

61. Positive periodic solutions of differential equations with distributed delay, *Proceedings of Neural, Parallel, and Scientific Computations*, **4** (2010), 221-226. (with M. Wang)

62. Higher order multi-point boundary value problems with sign-changing nonlinearities and nonhomogeneous boundary conditions, *E. J. Qualitative Theory of Diff. Equ.*, **28** (2010), 1-40. (with J. R. Graef, L. Kong, and J. S. W. Wong)

63. Nonlinear initial problems with p-Laplacian, *Dynamic Systems Appl.*, **19** (2010), 33-44. (with X. Wang).

64. Positive solutions of even order system periodic boundary value problems, *Nonlinear Analysis-TMA*, **72** (2010), 1778-1791. (with M. Wang)

65. Nodal solutions of multi-point boundary value problems, *Nonlinear Analysis-TMA*, **72** (2010), 382-389. (with L. Kong and J.S. W. Wong)

66. Higher order boundary value problems with nonhomogeneous boundary conditions, *Nonlinear Analysis-TMA*, **72** (2010), 240-261. (with L. Kong)

67. Use time scales to study impulsive functional differential equations, *Dynamics of Continuous, Discrete and Impulsive Systems Series A: Mathematical Analysis*, **16** (2009) 637-648.

68. Nodal solutions of nonlocal boundary value problems, *Mathematical Modelling and Analysis*, **14** (2009), 435-450. (with L. Kong and J. Chamberlain)

69. Existence of Nodal Solutions of Multi-Point Boundary Value Problem, *Discrete and Continuous Dynamic Systems, Supplement* 2009, 457-465. (with L. Kong)

70. Positive solutions of second order nonlinear difference boundary value problems, *Electronic Journal of Qualitative Theory of Differential Equations, Spec. Ed. I, 2009*, No. 18, 1-15; http://www.math.u-szeged.hu/ejqtde/, (with M. Wang)

71. Uniqueness and parameter-dependence of solutions of second order boundary value problems, *Appl. Math. Letters*, **22** (2009), 1633-1638. (with L. Kong)

72. Matrix representations of Sturm-Liouville problems with finite spectrum, *Result. Math.*, **54** (2009), 103-116. (with H. Volkmer and A. Zettl)

73. Kamenev-type oscillation criteria for second-order matrix dynamic equations on time scales, *Dynamic Systems Appl.*, **18** (2009), 423-440. (with Q.-R. Wang and Z. Q. Zhu)

74. Existence of Three Solutions of a Higher Order Boundary Value Problem, *Elect. J. Differential Equations*, **Conf. 17** (2009), 71-80. (with J. R. Graef and L. Kong)

75. Nodal solutions of second order nonlinear boundary value problems, *Math. Proc. Camb. Phil. Soc.*, **146** (2009), 747-763. (with L. Kong)

76. Periodic solutions of impulsive neutral dynamic equations on time scales, *Dynamic Systems Appl.*, **5** (2008), 258-262. (with D. Piao)

77. Sturm-Liouville problems on time scales with separated boundary conditions, *Results in Mathematics*, **52** (2008), 111-121.

78. Limits of Sturm-Liouville eigenvalues when the interval shrinks to an end point, *Proc. Roy. Soc. Edinburgh Sect. A*. **138** (2008), 323-338. (with H. Wu and A. Zettl)

79. Right-indefinite half-linear Sturm-Liouville problems, *Computers and Mathematics with Applications*, **55** (2008), 2554-2564. (with L. Kong)

80. Geometric aspects of Sturm–Liouville problems III. Level surfaces of the nth eigenvalue, *Journal of Computational and Applied Math.*, **208** (2007), 176-193. (with X. Cao, H. Wu, and A. Zettl)

81. Existence and nonexistence of solutions of second-order nonlinear boundary value problems, *Nonlinear Analysis*, **66** (2007), 2635-2651.

82. Nonoscillation and oscillation of second order half-linear differential equations, *J. Math. Anal. Appl.*, **332** (2007), 512-522.

83. Right-definite half-linear Sturm-Liouville problems, *Proc. Roy. Soc. Edinburgh Sect. A*, **137** (2007), 77-92. (with L. Kong)

84. Second-order Boundary Value Problems with Nonhomogeneous Boundary Conditions (II), *J. Math. Anal. Appl.*, **330** (2007), 1393-1411. (with L. Kong)

85. Symmetric positive solutions of nonlinear boundary value problems, *J. Math. Anal. Appl.*, **326** (2007), 1310-1327. (with J. R. Graef, L. Kong)

86. Multi-point boundary value problems with nonhomogeneous boundary conditions (II), *Communications on Applied Nonlinear Analysis*, **14** (2007), 93-111. (with L. Kong)

87. A telescoping principle for oscillation of second order differential equations on a time scale, *Rocky Mountain J. Math.*, **36** (2006), 149-181. (with L. Erbe and L. Kong)

88. New Kamenev-type oscillation criteria for second-order differential equations on a measure chain, *Computers and Mathematics with Applications*, **60** (2005), 1211-1230. (with A. Del Medico)

89. Positive solutions of higher order boundary value problems, *Proc. Edinburgh Math. Soc.*, **48** (2005), 445-464. (with L. Kong)

90. Second-order boundary value problems with nonhomogeneous boundary conditions, *Math. Nach.*, **278**(2005), 173-193. (with L. Kong)

91. A class of nonlinear boundary value problems of second-order ordinary differential equations, *Proceeding of Dynamic Systems Appl.* **4**(2004), 465-471. (with L. Kong)

92. Singular left-definite Sturm-Liouville problems, *J. Differential Equations*, **206**(2004), 1-29. (with H. Wu and A. Zettl)

93. Regular approximations of singular Sturm-Liouville problems with limit-circle endpoints, *Results in Math.*, **45**(2004), 274-292. (with L. Kong, H. Wu, and A. Zettl)

94. Multi-point boundary value problems with nonhomogeneous boundary conditions, *Nonlinear Analysis*, **58**(2004), 909-931. (with L. Kong)

95. Multiplicity of Sturm-Liouville eigenvalues, *J. Computational and Applied Math.*, **171**(2004), 291-309. (with H. Wu, and A. Zettl)

96. Kamenev-Type and Interval Oscillation Criteria for Second-Order Linear Differential Equations on a Measure Chain, *J. Math. Anal. Appl.*, **294**(2004), 621-643. (with A. Del Medico)

97. Geometric aspects of Sturm-Liouville problems, II. Space of boundary conditions for left-definiteness, *Trans. Amer. Math. Soc.*, **356** (2004), 135-157. (with K. Haertz, H. Wu, and A. Zettl)

98. Indefinite Sturm-Liouville problems, *Proc. Roy. Soc. Edinburgh Sect. A*, **133**(2003), 639-652. (with M. Moller, H. Wu, and A. Zettl)

99. Sturm-Liouville problems whose leading coefficient function changes sign, *Canadian J. Math*, **55**(2003), 724-749. (with X. Cao, H. Wu, and A. Zettl)

100. Eigenvalue problems in fuel cell dynamics, *Proc. R. Soc. Lond. Sect. A*, **459**(2003), 241-261. (with P. B. Bailey, J. Billingham, R. J. Cooper, W. N. Everitt, A. C. King, H. Wu, and A. Zettl)

101. Positive solutions of boundary value problems for functional differential equations, *Dynamics of Continuous, Discrete and Impulsive systems*, **10**(2003), 103-116. (with L. Kong)

102. Positive solutions of nonlinear m-point boundary value problems on a measure chain, *J. Difference Eqns. Appl.*, **9**(2003), 121-133. (with L. Kong)

103. Even order nonlinear eigenvalue problems on a measure chain, Nonlinear Analysis: Series A Theory and Methods, **52**(2003), 1891-1909. (with L. Kong)

104. Multiplicities of eigenvalues of a vector-valued Sturm-Liouville problem, *Mathematika*, **49**(2002), 119-127.

105. Nonoscillation of a class of neutral differential equations, *Computers and Mathematics with Applications*, **44**(2002), 643-654. (with Y. Sun and B. G. Zhang)

106. Positive solutions of boundary value problems for third-order functional difference equations, *Computers and Mathematics with Applications*, **44**(2002), 481-489. (with L. Kong and B. G. Zhang)

107. Left-definite Sturm-Liouville problems, *J. Differential Equations*, **177**(2001), 1-26. (with H. Wu and A. Zettl)

108. Sturm-Liouville problems with finite spectrum, *J. Math. Anal. Appl.*, **263**(2001), 748-762. (with H. Wu and A. Zettl)

109. The derivative of the matrix exponential function, *Cubo Mathemática Educacional*, **3**(2001), 121-124. (with A. Zettl)

110. Stability of nonlinear ordinary differential systems, *Proc. of International Conference on Differential Equations and Computational simulations*, Chengdu, China, 1999, Edited by P. W. Bates, K. Lu, and D. Xu, World Scientific, Singapore, New Jersey, London, Hong Kong, 149-159, 2001.

111. Oscillation of second order matrix differential equations, *Differential Equations and Dynamical Systems*, **8**(2000), 99-110.

112. Geometric aspects of Sturm-Liouville problems, I. Structures on spaces of boundary conditions, *Proc. Roy. Soc. Edinburgh Sect. A*, **130**(2000), 561-589. (with H. Wu and A. Zettl)

113. A new proof of the inequalities among Sturm-Liouville eigenvalues, *PanAmerican Mathematical Journal*, **10**(2000), 1-11. (with Q. Lin, H. Wu, A. Zettl)

114. Oscillation of solutions of nonlinear parabolic differential-difference equations in noncylindrical domains, *Indian J. Pure Applied Math.*, **30**(1999), 1173-1180. (with D. Bainov and E. Minchev)

115. Inequalities among eigenvalues of singular Sturm-Liouville problems,*Dynamic Systems Appl.*, **8**(1999), 517-531. (with H. Wu and A. Zettl)

116. Dependence of the n-th Sturm-Liouville eigenvalue on the problem, *J. Differential Equations*, **156**(1999), 328-356. (with H. Wu and A. Zettl)

117. Inequalities among eigenvalues of Sturm-Liouville problems, *J. Inequalities and Applications*, **3**(1999), 25-43. (with M. Eastham, H. Wu, and A. Zettl)

118. Oscillation criteria for second order half-linear differential equations, *Proc. International Conf. on Diff. Equations with Applications to Biology*, Fields Institute Communications by AMS, **21**(1999), 317-323.

119. Interval criteria for oscillation of second order linear ordinary differential equations, *J. Math. Anal. Appl.*, **229**(1999), 258-270.

120. Oscillation results for linear differential systems of second order, *Canadian Applied Mathematics Quarterly*, **6**(1998), 157-172.

121. Dependence of eigenvalues on the problem, *Mathematische Nachrichten*, **188**(1997), 173-201. (with H. Wu and A. Zettl)

122. Some necessary and sufficient conditions for oscillation of neutral differential equations, *Applicable Analysis*, **60**(1996), 133-148. (with L. Erbe)

123. Eigenvalues of regular Sturm-Liouville problems, *J. Differential Equations*, **131**(1996), 1-19. (with A. Zettl)

124. Dependence of eigenvalues of Sturm-Liouville problems on the boundary, *J. Differential Equations*, **126**(1996), 389-407. (with A. Zettl)

125. Asymptotic behavior of nonlinear neutral differential equations, *Proc. First World Congress of Nonlinear Analysts*, Tampa, Florida, Edited by V. Lakshmikantham, Walter de Gruyter, Berlin, New York, 1996, 1483-1495.

126. Oscillation for systems of functional differential equations, *J. Math. Anal. Appl.*, **198**(1996), 608-619.

127. Asymptotic behavior of retarded integro-differential equations, *J. Jianghan University*, **12**(1996), 51-55. (with Y. Ding) (in Chinese)

128. Oscillatory and asymptotic behavior of a discrete logistic model, *Rocky Mountain J. Math.*, **25**(1995), No. 1, 339-349.

129. Oscillation of second order nonlinear difference equations, *J. Difference Equations and Applications*, **1**(1995), 271-289.

130. On the oscillation of differential equations with oscillatory coefficients, *Transactions of Amer. Math. Soc.*, **347**(1995), 1831-1839. (with B. J. Harris)

131. Dissipation, boundedness and persistence of general ecological systems, *Nonlinear Analysis -TMA*, **25**(1995),1237-1250. (with X. Liao)

132. Interval oscillation conditions for difference equations, *SIAM J. Math. Anal.*, **26**(1995), 1047-1060. (with A.Zettl)

133. Oscillation results on linear systems of difference equations, *Proc. Amer. Math. Soc.*, **123**(1995), 3057-3065.

134. Boundary value problems for singular second order functional differential equations, *J. Computational and Applied Math.*, **53**(1994), 377-388. (with L.H. Erbe)

135. Linear ordinary differential equations, *Inequalities and Applications of WSSIAA*, **3**(1994), 381-397, World Scientific Publishing Company. (with A. Zettl)

136. Oscillation and nonoscillation properties of neutral differential equations, *Canadian J. Math*, **46**(1994), 284-297. (with L. H. Erbe)

137. Explicit conditions for oscillation of solutions to neutral differential systems, *Hiroshima Math. J.*, **24**(1994), 317-329. (with L. H. Erbe)

138. Oscillation of a forced second order nonlinear equation, *Chin. Ann. of Math.*, **15B: 1**(1994), 59-68. (with B. G. Zhang)

139. Single species models with monotonic and oscillating carrying capacities, *Far-East J. Math. Sciences*, **1**(1993), 35-43. (with H. I. Freedman)

140. Oscillations in delay differential systems, *Diff. Integral Equations*, **6**(1993), 1325-1336. (with H. I. Freedman)

141. Oscillation of partial differential equations with deviating argument, *Utilitus Math.*, **43**(1993), 129-139. (with L. H. Erbe and B. G. Zhang)

142. Kamenev type theorems for second order matrix differential systems, *Proc. Amer. Math. Soc.*, **117**(1993), 957-962. (with L. H. Erbe and S. Ruan)

143. Oscillation results for second order neutral differential equations, *Funkcialaj Ekvacioj (Serio Internacia)*, **35**(1992), 545-555. (with L. H. Erbe)

144. Asymptotic behavior of a class of delay differential equations of nth order, *J. Ocean Univ. of Qingdao,* **22**(1992), 145-158.

145. High Dimensional Gronwall-Bihari type inequalities involving improper integrals, *Ann. Differential Equations.*, **7**(1991), 171-180. (with B. G. Zhang)

146. Stieltjes integral inequalities of Gronwall type and applications, *Ann. Mat. Pura. Appl.*, **CLVII**(1990), 77-97. (with L. H. Erbe)

147. On Olech-Opial-Wazewaski oscillation criteria for second order nonlinear equations *Nonlinear Analysis-TMA*, **14**(1990), 379-391. (with L. H. Erbe)

148. Oscillatory behavior of solutions of first order nonlinear functional differential equations, *J. Ocean Univ. of Qingdao*, **20**(1990), 123-137.

149. Some Generalizations of Gronwall- Bihari integral inequalities and their applications, *Chin. Ann. of Math.*, **10B**(1989), 371-385. (with B.G.Zhang)

150. Asymptotic behavior of a class of nonlinear differential equations of nth order, *Proc. Amer. Math. Soc.*, **103**(1988), 831-838.

151. Oscillation of Volterra-Stieltjes equations, *Differential Equations and Applications*, Vol. **I** (Columbus, OH, 1988), 249-256, Ohio University Press, Athens, OH. (with L. H. Erbe)

152. Some generalization of Gronwall-Bihari integral inequalities, *Kexue Tongbao*(Chinese edition), **32**(1987), 396-397; and *Kexue Tongbao* (English edition), **32**(1987), 1364-1365. (with B. G. Zhang)

153. Distinction problems of a class of competitive systems of almost periodic coefficients, *J. Shandong College of Oceanology*, **17**(1987), 160-167. (in Chinese)

154. A discussion of asymptotic behavior of solutions of a class of second order differential equations, *J. Shandong College of Oceanology*, **13**(1983), 89-100. (in Chinese)
