

Krypto

A Krypto Deck consists of 56 cards:

- 3 each of the numbers 1 to 6

Krypto

A Krypto Deck consists of 56 cards:

- 3 each of the numbers 1 to 6
- 4 each of the numbers 7 to 10

Krypto

A Krypto Deck consists of 56 cards:

- 3 each of the numbers 1 to 6
- 4 each of the numbers 7 to 10
- 2 each of the numbers 11 to 17

Krypto

A Krypto Deck consists of 56 cards:

- 3 each of the numbers 1 to 6
- 4 each of the numbers 7 to 10
- 2 each of the numbers 11 to 17
- 1 card each of the numbers 18 to 25

Five cards are dealt from a Krypto deck, face-up.

Krypto

A Krypto Deck consists of 56 cards:

- 3 each of the numbers 1 to 6
- 4 each of the numbers 7 to 10
- 2 each of the numbers 11 to 17
- 1 card each of the numbers 18 to 25

Five cards are dealt from a Krypto deck, face-up.

A single card is placed face-up above these 5 cards.

This is the target or objective number.

Krypto

A Krypto Deck consists of 56 cards:

- 3 each of the numbers 1 to 6
- 4 each of the numbers 7 to 10
- 2 each of the numbers 11 to 17
- 1 card each of the numbers 18 to 25

Five cards are dealt from a Krypto deck, face-up.

A single card is placed face-up above these 5 cards.

This is the target or objective number.

Each player must use all five of the cards' numbers exactly once, using any combination of arithmetic operations ($+$, $-$, $\times$, $\div$) to form the objective card's number.

- 2 each of the numbers 11 to 17
- 1 card each of the numbers 18 to 25

Five cards are dealt from a Krypto deck, face-up.

A single card is placed face-up above these 5 cards.

This is the target or objective number.

Each player must use all five of the cards' numbers exactly once, using any combination of arithmetic operations ($+$, $-$, $\times$, $\div$) to form the objective card's number.

The first player to come up with a correct formula is the winner.

Rules

Each of the five numbers must be used once and only once.

Rules

Each of the five numbers must be used once and only once.

No other numbers are allowed.

Rules

Each of the five numbers must be used once and only once.

No other numbers are allowed.

The five numbers may be ordered in any way you choose.

Rules

Each of the five numbers must be used once and only once.

No other numbers are allowed.

The five numbers may be ordered in any way you choose.

You can use parentheses in any way you choose.

Rules

Each of the five numbers must be used once and only once.

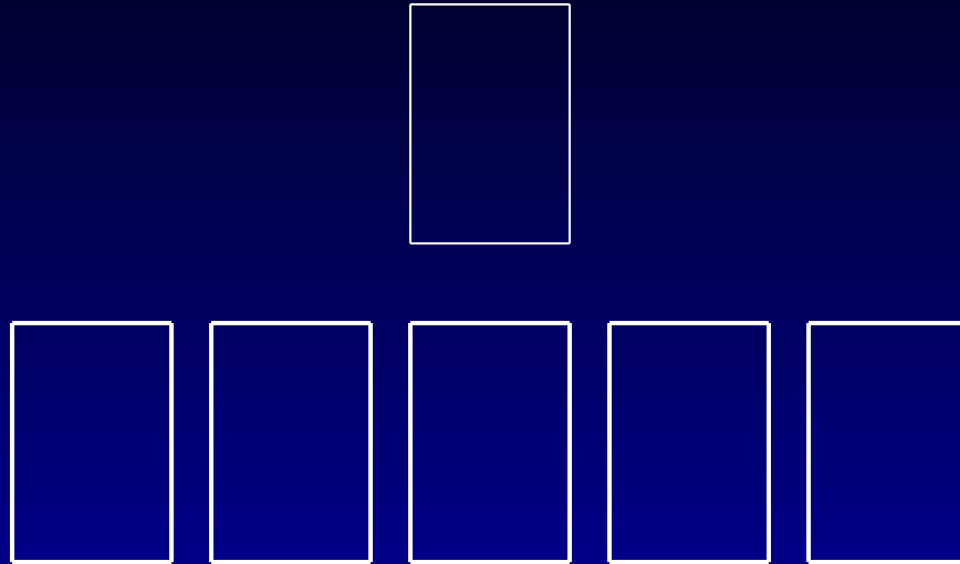

No other numbers are allowed.

The five numbers may be ordered in any way you choose.

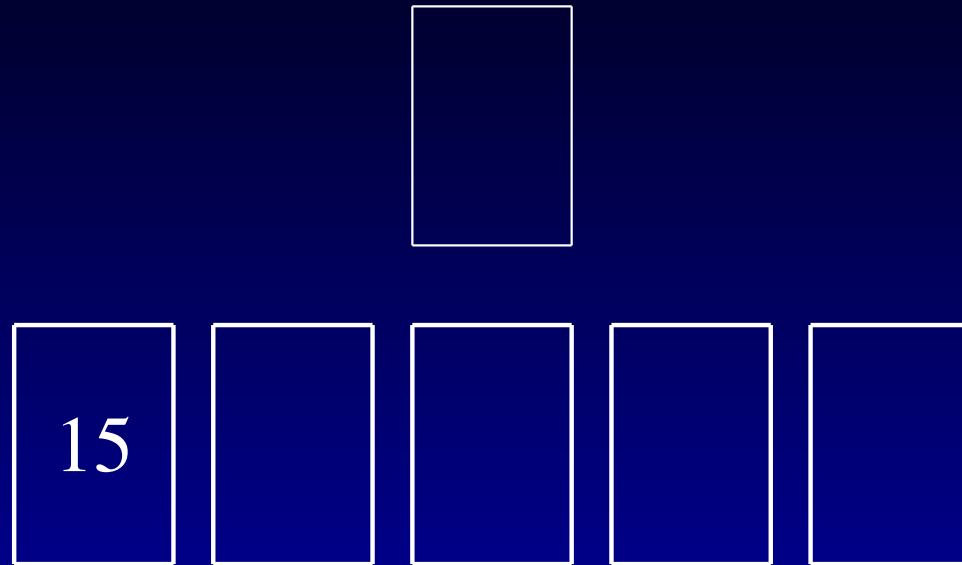

You can use parentheses in any way you choose.

No other mathematical symbols, such as $\sqrt{\quad}$ or factorials, is allowed.
